Public comments wanted for Lancaster County's 20-year transportation plan and upcoming transportation project list

Review the following by June 12, 2024:

- **connects2050: A Transportation Plan for the County.** *Connects2050* is Lancaster County's plan to meet the mobility needs of people and goods in Lancaster County over the next few decades. We use the information we gather for this plan to coordinate with our partners and direct around \$81 million in funding per year. This funding goes towards maintenance and improvement of our transportation system.
- **The 2025–2028 TIP: A List of Transportation Projects for the Next Four Years.** The TIP represents the next 4 years of transportation projects such as road resurfacings, bike trails, bridge repairs, and traffic signal improvements. The county works with PennDOT and the South Central Transit Authority on a recurring listing of projects called the TIP. It is updated every other year.
